Extra-School Activities 2022/23

We are aware of the importance of educational opportunities outside of school hours for the continued development of our students.

For this reason, it is our pleasure to present the Extra-School Activity Programme for the 2022/23 academic year based on three major areas - sports, the arts and academic activities.

We offer music and scenic arts as part of the arts programme and STEAM (robotics), languages, debates and public speaking, academic support and entrepreneurship within the academic programme.

The complete programme offers excellent learning contexts and the opportunity to make new friends, discover talents and skills and acquire values and habits essential for the integral development of children.

It is important that they choose activities that they are interested in and enjoy to the full so that their social, emotional and interpersonal skills, academic performance and general health can benefit.

Academic Support

- Primary, ESO & Baccaureate
- Days & Times: According to availability & subjects
- Price:
Individual 39€/session
Group 26€/session
- Organised by: Nuri Samper
nuri.samper@agorsantcugat.edu.es
- Programme & Objectives:

Offer the support and reinforcement needed in the selected subject to develop their full potential or help them overcome issues in which they have difficulties.

Budding Entrepreneurs

- Activity in English
- Primary 5 & 6
- Days & Times: Tuesday 16:45 to 17:45h
- Price: 68 €/month
- Organised by: StartKidsUp (Project promoted by ESADE)
francesc.guijosa@agorasantcugat.edu.es

• Programme & Objectives:

In this activity, children will develop from an early age the ability to innovate and create their own company while developing their self-esteem and flexibility while having fun.

The development of initiative and entrepreneurial spirit allows children to enhance their creativity while learning to:

- Identify opportunities in their environment - Observation and Critical Thinking.
- Propose feasible solutions - Creativity and Teamwork.
- Quantify resources to make a viable proposal - Organisation and financial skills.
- Present their ideas convincingly - Communication skills.

Each term ends with the creation of a team startup.

Examples of projects created by children in previous StartKidsUp activities:

- Dogtouch: an iPad for pets.
- Secret Letter: a platform to leave anonymous messages to people close to you.
- Calrer: Smart watches on the street that are synchronised with your phone's agenda.

Teens Entrepreneurs

- Activity in English
- ESO 1 & 2
- Day & Time: Wednesday 16:45 to 17:45
- Price: 79€/month
- Organised by: StartTeensUp (Project promoted by ESADE)
francesc.guijosa@agorasantcugat.edu.es

· Programme & Objectives:

Creating a startup involves thinking about how we can combine our talent and that of others to generate an impact through innovation.

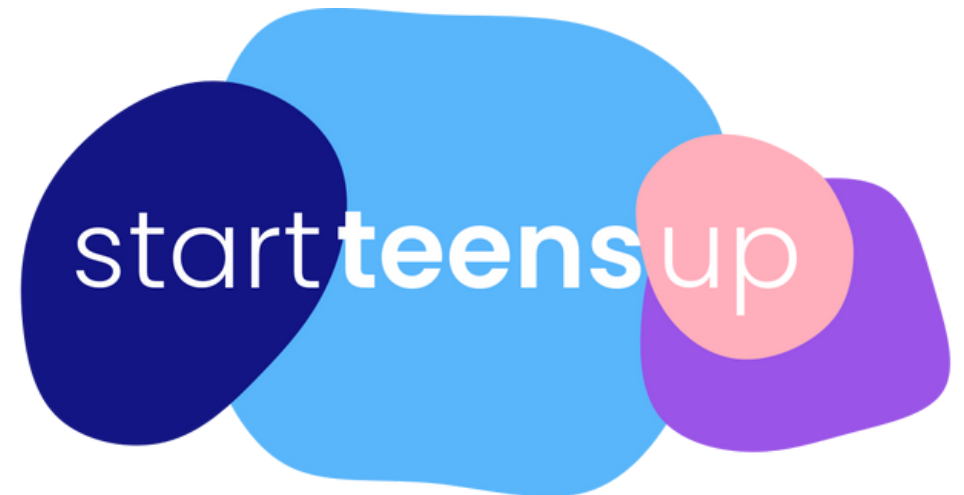

This activity is for students who want to:

- Work on the most necessary skills for the future: creativity, critical thinking and leadership.
- Know how companies are created today.
- Be part of a cohesive team that, like them, want to change the rules of the game.
- Investigate what they would like to study in the coming years.

Improve academic performance and ability to influence.

The programme is based on Design Thinking, a method popularised by Standord University and used today by most startups to solve problems through innovations that add value to people. StartTeensUp encourage teenagers to learn about creativity and communication, strategy and planning or financial education.

Each term ends with the creation of a startup by the teams.

SAT Course Preparation

- . For Baccalaureate students
- . Collaboration with Blyth Academy
- . Programme and Objectives:
 - The SAT is an official US examination that allows students to apply for admission to universities in the USA and obtain academic or sports scholarships/grants.
 - The SAT examination does not assess the knowledge acquired in Baccalaureate but assesses students' future learning abilities.
 - Students are NOT required to have finished Baccalaureate to present themselves for the SAT examination.

In addition to being an official SAT examination school, ASCIS offers Blyth Academy courses (another member school of Globeducate), to help prepare for the examination.

For more information, please contact Marc Andreu (marc.andreu@agoraisbarcelona.edu.es).

Fun Science

- Primary 1 to Primary 4
- Days & Times: Monday & Thursday 13:30 to 14:30
- Price: 62€/month
- Teacher: Bernat Soto
bernat.soto@agorasantcugat.edu.es
- Programme & Objectives:

Encourage students' interest and curiosity in Science by taking part in and observing different experiments. Students scientifically guided as they discover chemical reactions, forces, measurement, light, electricity etc. to awaken a scientific interest in Physics, Chemistry, renewable energies, electricity, magnetism and astronomy.

Robotics

• P4 to ESO

• Price: Tuition 40€/year
 P4 & P5 68€/month
 Primary 92€/month
 Primary 1 to Primary 4
 Afternoon (16:30-18:00) 115€/month

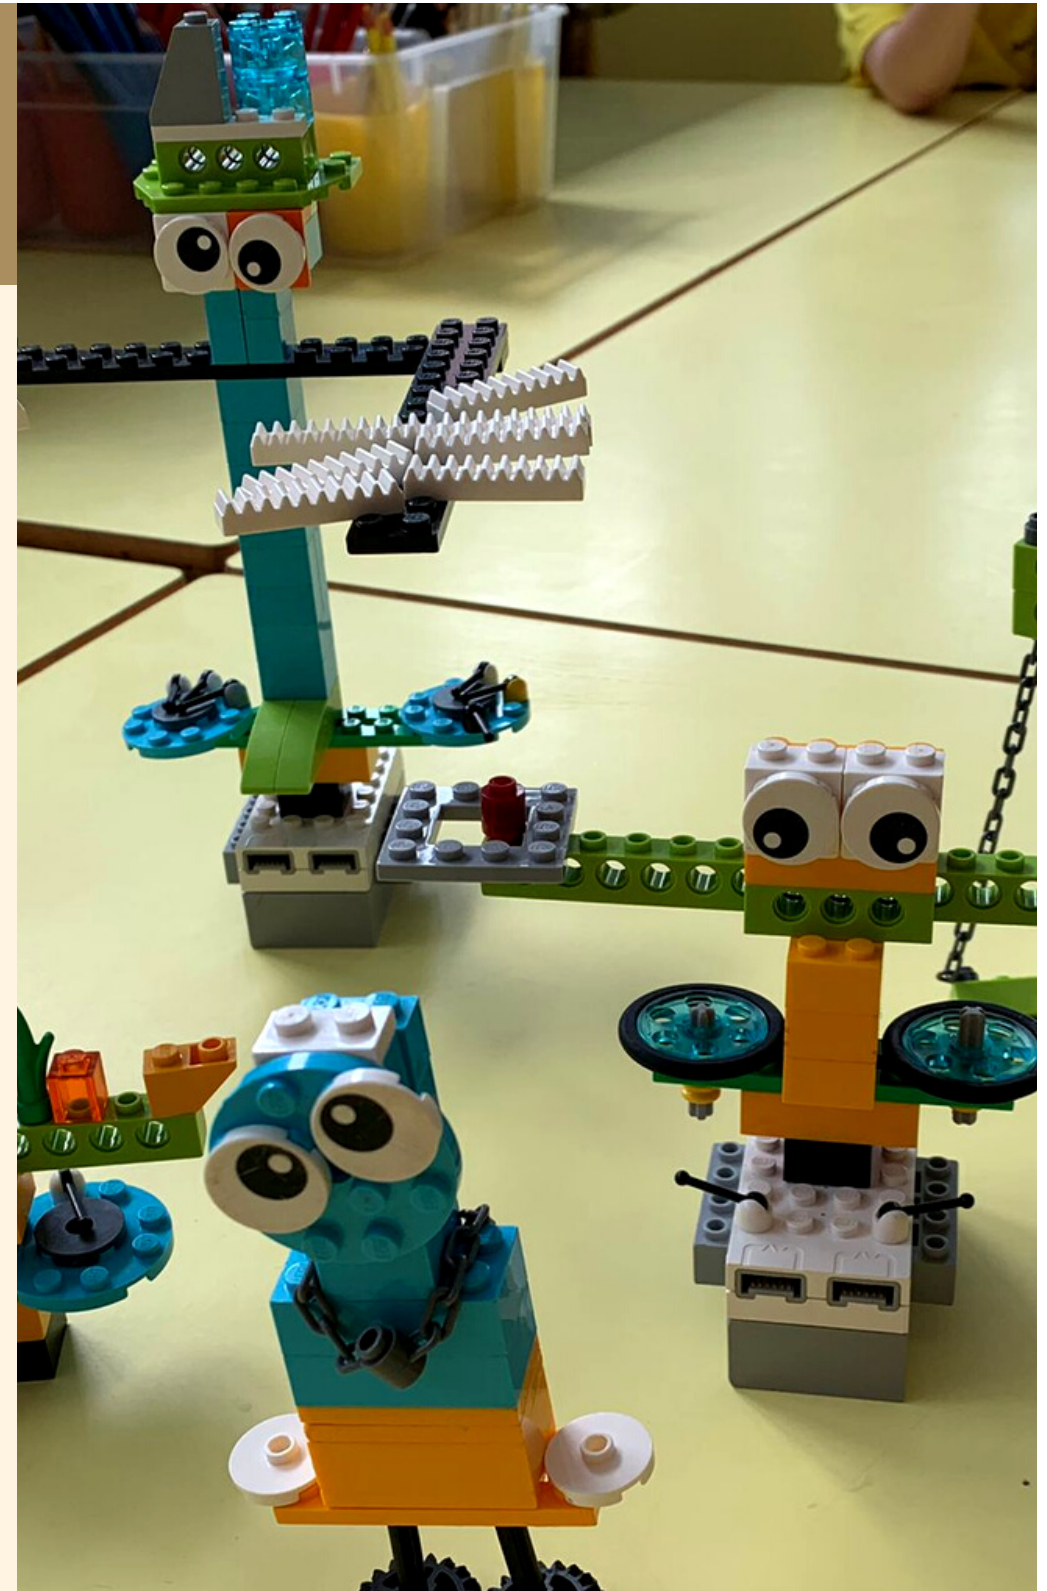

• Organised by: TB KIDS
vicky@tbkids.es

• Programme & Objectives:

- Understand the basic operation of a robot, promoting creativity and learning from guided projects that lead to the resolution of challenges.
- STEAM concepts are promoted in all sessions and our objective is the construction of robotic prototypes and their programming.
- Platforms used: Fischertechnik, Lego WeDo 2.0, as well as different robots etc.
- Programming based on mathematical algorithms. In robotic construction, energy sources, energy chains, as well as mechanical operators are identified.

• Days & Times

	Monday	Tuesday	Wednesday	Thursday	Friday
12:50-13:50				P4 & P5	P4 & P5
13:50-14:50			PRIMARY 3 & 4	PRIMARY 1 & 2	PRIMARY 1, 2, 3 & 4
13:50-14:50		PRIMARY 5 & 6	PRIMARY 5 & 6		
16:30-18:00		PRIMARY 1, 2, 3 & 4			

Robotics Club (including competing in the First Lego League)

- Secondary
- Days & Times: Monday & Wednesday 13:50 to 14:50
- Price: 55€/month
- Organised by: TB KIDS
- Programme & Objectives:
 - Project Theme: “Superpowered”
 - Robotics Club: Training for final competition from a practical point of view.
 - Learn and work fundamentals of robotics e.g. mechanics, sensors, programming, physics and mathematics.
 - Students will explore where energy comes from, how it is distributed, stored, and used. They will put their creativity to work to innovate for a better energy future. A team challenge through robotics and using the Lego® Spike Prime platform. <https://www.youtube.com/watch?v=okR1AMFNV3>

The First Lego League is an international programme that aims to spark an interest in science and technology among young people working in cooperative robotics teams.

The challenge consists of three parts -
Completing a scientific project with an innovative solution.
The Robot Competition in which each team builds a robot to solve the missions that are presented in a game against the clock.

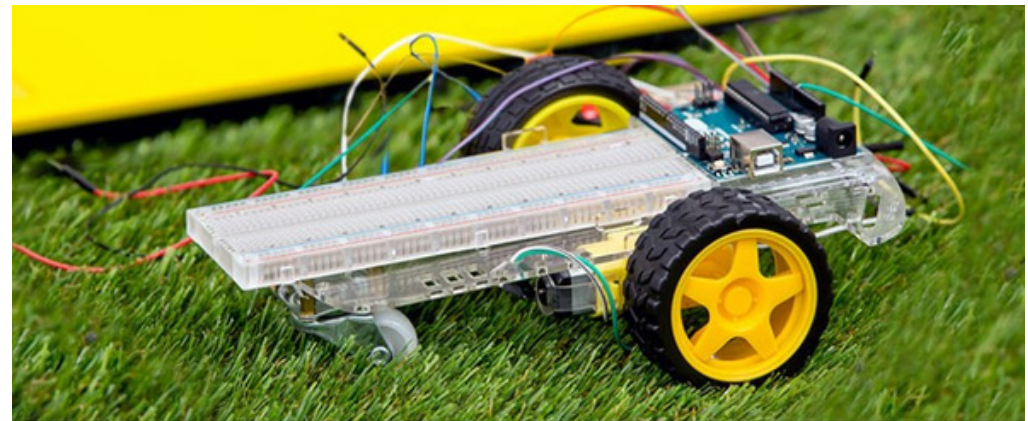

Presentation of First Lego League values.

All this will be guided by the Tech Coach who will help students think about and complete all the challenges.

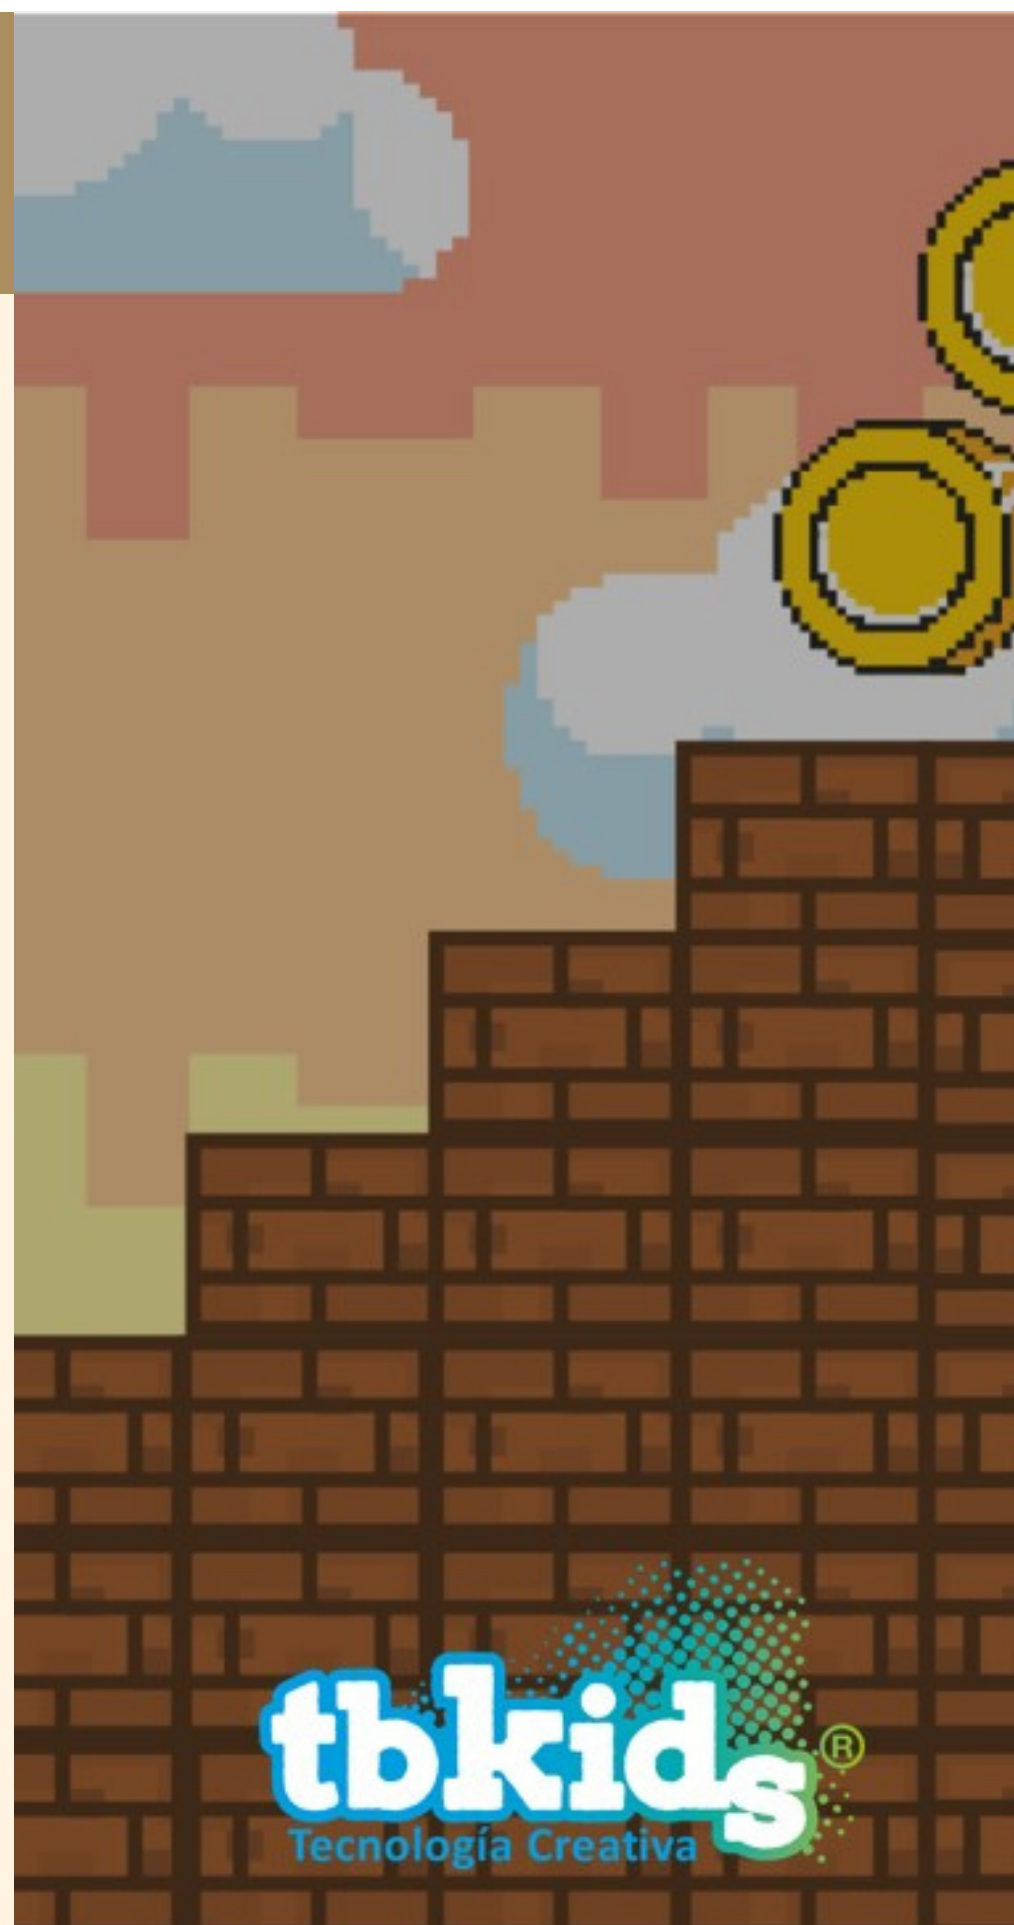

Creative Technology & Technopreneur

- Primary 4 to ESO
 - Days & Times:
 - Primary 4 & 5 Tuesday 13:30 to 14:30
 - Primary 6 & ESO Monday 14:00 to 15:00
 - Price: 84€/month
 - Organised by: TBKIDS
vicky@tbkids.es
 - Programme & Objectives
 - Through this activity we offer different platforms and the necessary resources to promote knowledge about creative technology.
 - The objectives are framed within the STEAM methodology and concepts (science, technology, engineering, art and mathematics), as well as entrepreneurial values such as: curiosity to learn, creativity, critical and digital thinking, collaboration and communication.
- Three terms divided into three projects:
- Design, prototyping with Tinkercad and digital fabrication through 3D printing. Drone prototyping and flight learning.
 - Programming concepts through different programming languages to develop digital skills.
 - Electronic robotics through boards like Microbit.

Videogames Design

- Secondary
- Days & Times: Tuesday 16.50 to 18.00
- Price: 68€/month
- Organised by: TBKIDS
vicky@tbkids.es
- Programme & Objectives:
 - Learn programming through different platforms and programming languages each term.
 - §RPG Maker
 - Introduction to 2D video game design development using Ruby or JavaScript as a programming language, anIt has a very attractive and motivating interface.
 - RobloxStudio.
 - Roblox Studio's features are accessible to a variety of skill levels ranging from a beginner to an experienced programmer. The tools range from the simple manipulation of objects or terrain, to the introduction of complex scripts and game functions.
 - Between one project and another, sessions of Kodu or Minecraft with Redstone will be introduced to introduce basic programming concepts.

Learn with Minecraft

- Primary 3 & 4
- Primary 5 & 6
- Days & Times:

Primary 3 & 4 Tuesday 13:50 to 14:50

Primary 5 & 6 Thursday 13:50 to 14:50

- Price: 68€/month 1 session per week
- Organised by: TbKids
vicky@tbkids.es
- This activity is an extension of their learning in school and in the digital skills STEAM (science, technology, engineering, art and mathematics).
- Digitally secure groups will be formed to promote socialisation and use gamification guided by a "Tech Coach" who will teach students how to overcome challenges of design, ingenuity and creativity within the Minecraft universe.
- Use Minecraft for its educational potential. In the cooperative challenges, soft skills highly demanded by companies today are worked on e.g. communication, creativity, teamwork, planning.
- Different projects are proposed each term to advance through the programming with basic electronic concepts with Redstone.

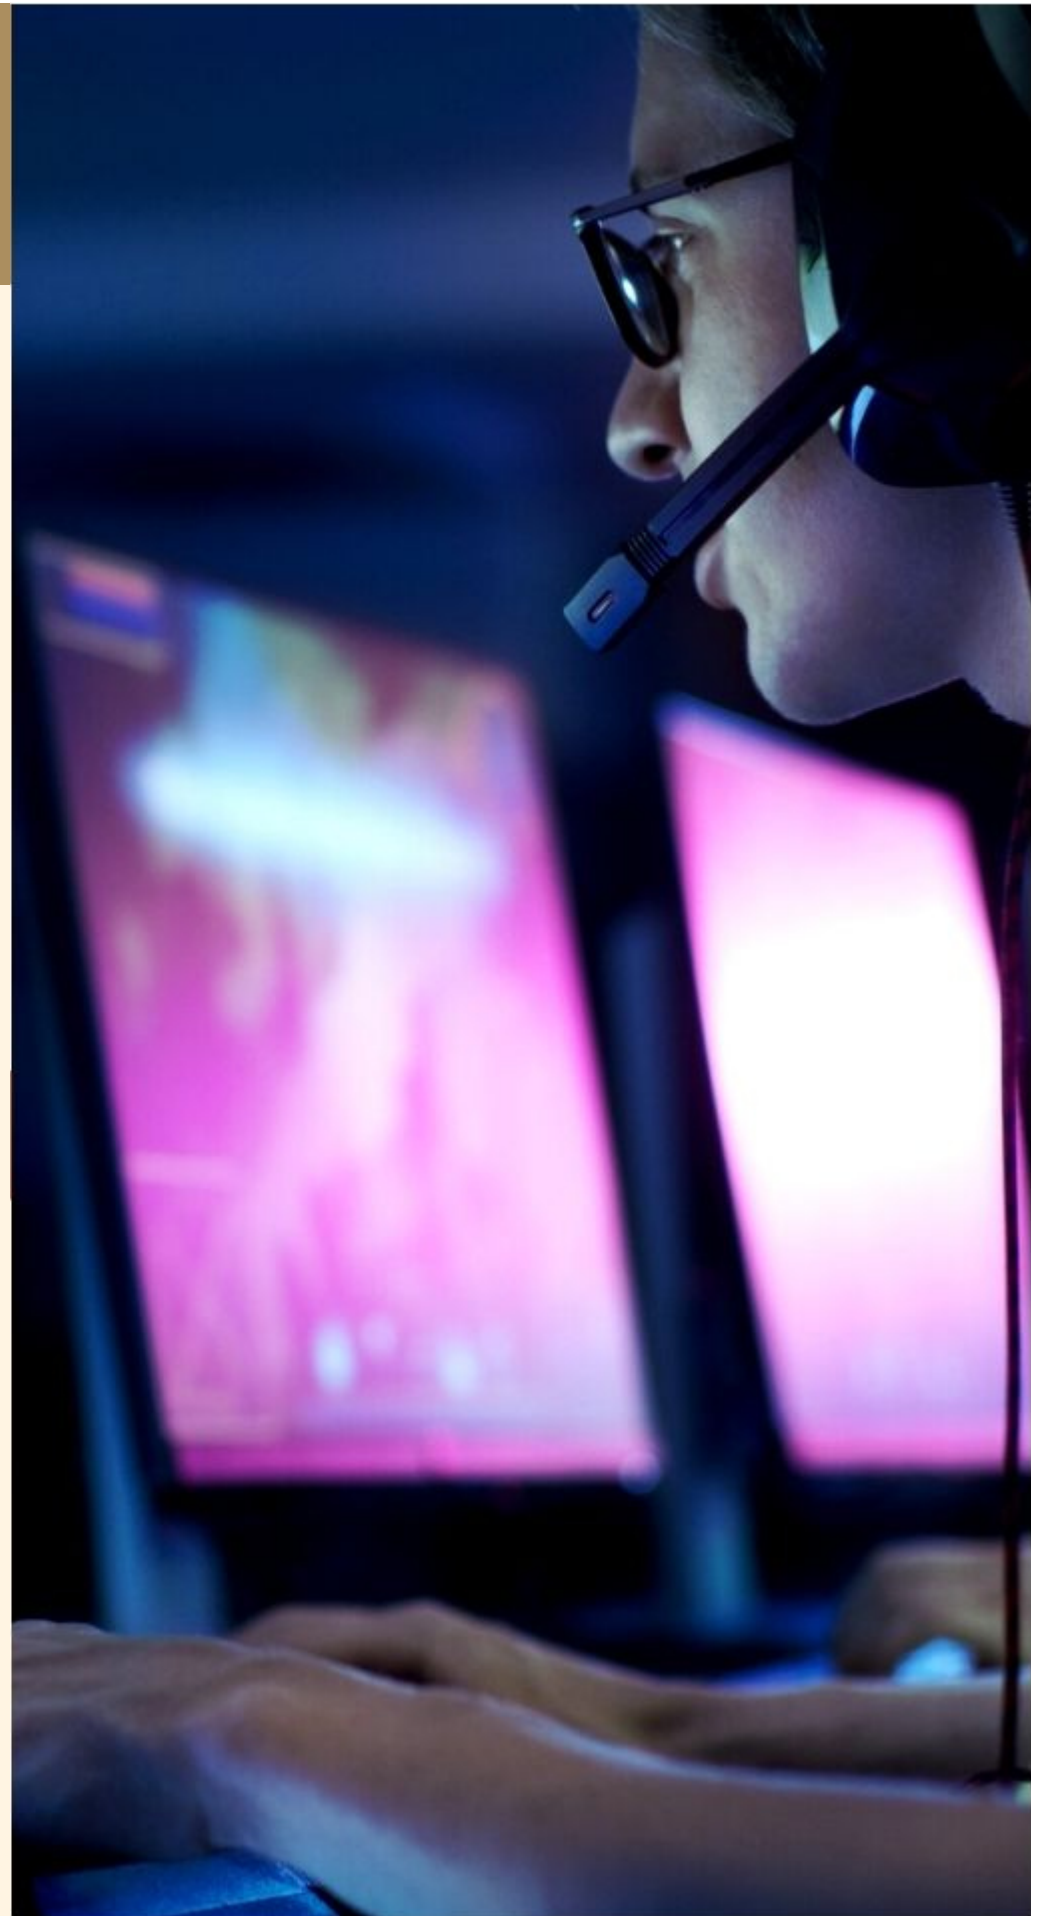

Virtual Reality & Drone Pilot

- Primary, ESO & Bacalaureate.
- Days & Times: Thursday 16:45 to 17:45
- Price: 68€/month One session per week
- Teacher: Marc Subirà (TECNOPARC)
franscesc.guijosa@agorasantcugat.edu.es
- Programme & Objectives:
 - Knowledge and learning of virtual reality.
 - Personal, creative and productive development in the virtual environment.
 - Development of teamwork for problem solving.
 - Creation and development of individual and collective projects.
 - Use of applications in virtual environments for students' emotional development.
 - Diversity of learning in a wide catalogue of thematic applications.
 - Biology, science, physics, management skills and many other subject areas besides games.
 - Introduction to the world of drones.
 - Third person piloting of indoor mini-drones and outdoor recreational drones.

e-Sports

- Secondary
 - Days & Times: Wednesday 13:50 to 14:50
 - Price: 68€/month
 - Organised by: Wizards Club
- franscesc.guijosa@agorasantcugat.edu.es
- Programme & Objectives:
 - Learn programming through the Unity 3D design platform.
 - Create your own story, move your characters and design your own world.
 - Stop being users of technology to be creators of it.

Digital Photography & Video

- Primary 5 & 6 and Secondary
- Days & Times: Tuesday 16:45 to 17:45
- Price: 68 €/mes
- Organised by: VT Image & Sound
- Programme & Objectives:
 - Acquire basic photographic knowledge to allow students to use different techniques when taking photographs. Eminently practical, it also combines technical and theoretical sessions.
 - Learn about Social Media best practices and safety.
 - Learn about the elements of a camera and objectives and their uses.
 - Basic Photography e.g. shutter, aperture, focal length, ISO, depth of field, composition rules, frames, natural light vs artificial light etc.
 - Practical exercises and assessment.
 - Equipment: Digital camera with manual mode shooting option or reflex camera with fixed or interchangeable lens or digital camera with manual mode shooting option.
